"This is something that you need to understand,
Ive Been a BAD MAN
but ive learned from that
hope the man upstairs will understand that". very fun game to play with friends
this game is simple but it requires precision and planning. I'm still questioning how I can fit a WHOLE SUIT OF ARMOUR in a desk space. Like seriously. How.. Good game and I really enjoyed it, but it's also fairly flat in depth. There really isn't a lot going on in it. Each battle plays out pretty much the same as the last, with some variations due to differences in map design. Still, I enjoyed the unique combat and how the terrain worked well enough to recommend it. I think everyone should check it out, but after you get how to fight\/win there really isn't anything else going on.. There's a demo available that contains a few tracks. If you're not sure whether you like the game or not, give the demo a try and see for yourself.

In a nutshell, you're standing on a stage where the instruments are rotating to your position, and you're either slamming on things, or use your glowing sticks to follow some pattern. That sounds a bit boring, but for me, it's fun. There are 33 or so songs to choose from, with various styles.

It might get repetitive after a while, but I think this is something you can always go back to and play again from time to time. It's well worth the money, especially discounted.

There's only a few things I really have to complain about, but none of them are really dealbreakers:

- There's no OST available and I believe no way to figure out where some songs come from (I really like some of them)

- I's sometimes not obvious why you need to play this "note" (as in, the rhythm isn't obviously matching with the song)

- The pads (drums and xylophone) might be a bit close to each other, making accidental hits a thing. That's just a matter of exercise though, I think.

- It takes a while until the game is started, and it rarely hangs and needs to be killed and restarted. I've had that happen only once so far.. The tile matching game is dull. There is no explanation of the specials which recharge making it overly easy. Notably, once uncovered each girl will chat with you but there is no guidance on what you can ask or say. Responses seem to be similar with every teacher and quite rando. This game is not worth 50 cents as it stands. The chat thing could have been fun, but it's a complete dud. I would imagine this critique would apply to all these "Keyhole" games.. You've never seen anything like this! Spacejacked is a incredibly polished, fast-paced and challenging experience that mixes elements of 2D platforming, tower defense with a great strategic layer built above it. Every choice matters in the game, and you would be making important decisions on what to build and not to build as your resources carry on to your next mission\/day. On a micro level, you will see yourself frantically managing your towers, reading enemy patterns, repairing your base. The graphics are really slick and smooth too!

  This is one of the freshest and most innovative game that has come out from the indie community, which has seen a lack of creativity in recent years. Support the devs!. Sorry, but difficulty level has nothing to do with this. Even the tutorial is just
  unplayable in the sense of "hey every opponent will one-shot you" kind of diffculty.

  The developers explained in the discussion forum how to act on those kind of
  enemies - imho did they plan\/implement it the right way? No.
  Having to save characters constantly afte being one-shotted, being it a "unconscious" state
  or being completey dead makes no difference here - is just bad gameplay.
  True tactics can only come into play if you have more than a binary state of your characters.

  Sorcerer are on level 1 not even able to use a range spell? Well... what?

10\/10. I totally recomend this game. It is an excellent demo of what a VR strategy game could be. They made an excellent use of the the VR 3D and immersion. The interface is innovative and extreemly intuitive, which has not been the case for 70% of my VR games. The only downside is it is overly simplistic for real gamers. It takes about 10 minutes to experience everything the game has to offer. I would love to see this game evolve into a full fledged strategy game which encompases research and a tech tree, and maybe even interaction between AI/other players.

Nice game! 10\/10 gameplay and soundtrack. the best thing about this mod is you can kill yankees as a german......
10/10 remove burger. Delivers on what it promises. While I personally can't give less of a damn about challenge modes in games, I see how that can be appealing to some people, especially with the combat system having quite a lot of deph (if you're in for the challenge).. Hey, remember Tetris? That's so last century. LUMINES is Tetris on acid. Sort of.

Instead of tetrominos you place 2x2 dual colored blocks on a larger grid to make single colour squares. The more squares you make, the more points you get. The trick is they're not instantly cleared, but stay on the grid until the timeline passes over. The timeline's speed depends on the BPM of the current song playing. That's basically all you do in most modes of the game.

Every song has its own visual skin you unlock by beating the main challenge campaign. Even more skins are unlocked by playing against the computer where you frantically make squares before your grid area is taken over. You can play against a friend locally in the same fashion. (No online, which is kind of a shame, but it's no big deal.) There are also more relaxed Puzzle modes where you need to make certain patterns in an almost Picross-like feel, and a Mission mode where you have specific tricky objectives to complete. Time Attack is self-explanatory. You can make your own playlist of your favourite skins and just clear squares for as long as you want, or repeat the campaign in endless rounds. They even added a shuffle mode where you go through each unlocked skin in random order.

The point of LUMINES, like other Mizuguchi works, is to achieve synesthesia, complete unity of all the senses you possess. Every input you make, from block rotation to square clears, has an appropriate visual and audio cue that depends on the skin. You can hook up several gamepads and let them vibrate on your body to the rhythm and your inputs. (Yes, really, do it.) The fantastic electronic beats and the trippy visuals lure you in and completely entrance you. It is pure aesthetic bliss. There's nothing quite like it.

If you already know of or play REZ, then this is a no-brainer. If you like puzzle games, this is a must buy. If you can read this review, you need this game in your life.

Keep on SHININ' Mizuguchi, you crazy diamond

Also play Tetris Effect on PSVR if you haven't!. The Oppressor gun FTW! Fun times!. Ok, first things first, this game is fun. Since political simulation games are a rare species, and this is one of the few of them, I normaly would recommend it to everyone who likes this type of games. You really have to work to have your plans work out, no matter if it's economic grow, demographics or military expansion. Especially the latter is hard to achieve, since you have to fight bad publicity both internationaly and intern. The gameplay is very deep and it's very challenging to achieve your goals.

The graphics are decent. Not good, not bad, but still enough for this type of game. As for sound, that's ok too. I dunno if it's a bug, but I hear the music of other games while playing this one (Distant Worlds).

The only reason why I don't recommend it is the simple fact that it has DRM. So you're not only limited to buy it on Steam here, but also have limited activations and... hell, I just hate DRM. Way to go, thank you Eversim. Unfortunatly I haven't read it, else I wouldn't have thought about buying it.

So, summerized:

Decent Game, a little buggy, but fun. I'll give it a 7\/10, because I like the genre and since this game is a rare specimen... and subtract 7 points for the DRM. That's 0\/10 for you, until the DRM is patched out. As soon as that is done, I'll make a recommention.
